

NMAT Performance Evidence for CHED Cut-Off Policy Review

This dashboard presents descriptive evidence from NMAT_Exodus.parquet (178,927 examinee records, 2006-2018) to inform the CMO amendment on NMAT cut-off scores. All analyses use validated data from the 4-pipeline processing system. PLE-linked analyses use the observable cohort (Year ≤ 2014) to avoid right-censoring bias.

National NMAT Profile and Coverage

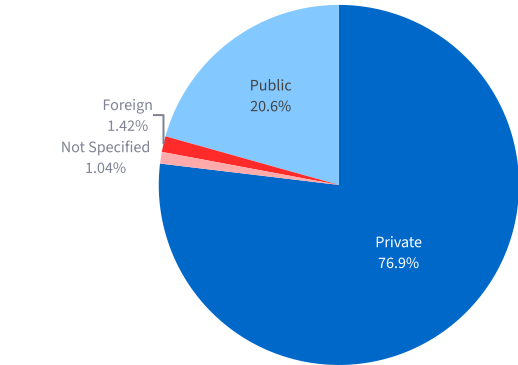

What this shows: the size, scope, and basic score distribution of the NMAT examinee population across 13 examination years. All score summaries use recalculated TRUE raw scores (the original stored total was inconsistent for 42.2% of records and has been corrected).

Best-record examinees	Unique persons (PERSON_KEY) ?	NMAT years covered	Median percentile rank
133,804	133,558	13	50.0

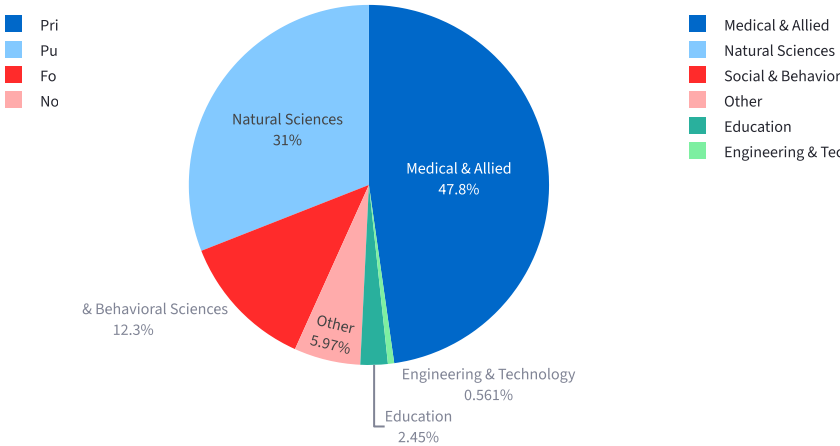

Examinee volume has grown substantially since 2015. Median bin rank has declined from 53-57 in earlier years to 43-48 in 2016-2018. These historical trends provide context for evaluating threshold impacts.

University Type Composition

Course Group Composition

Repeat-taker context. Of 133,558 unique examinees, 33,713 (25%) took the NMAT more than once (up to 9 attempts). All threshold counts in this dashboard use each examinee's best-record NMAT attempt to avoid inflating the applicant pool with repeat attempts.

Score Bin Reference

Each bin corresponds to a range of NMAT percentile rank scores. B4+ corresponds to the CMO exception floor (30th-39th percentile range). B5+ corresponds to the SUC standard floor (40th-49th percentile range).

Bin	Score Range	Threshold
B1	0-9	
B2	10-19	
B3	20-29	
B4	30-39	CMO exception floor (B4+)
B5	40-49	SUC standard floor (B5+)
B6	50-59	
B7	60-69	
B8	70-79	
B9	80-89	
B10	90-100
