

NMAT Performance Evidence for CHED Cut-Off Policy Review

This dashboard presents descriptive evidence from NMAT_Exodus.parquet (178,927 examinee records, 2006-2018) to inform the CMO amendment on NMAT cut-off scores. All analyses use validated data from the 4-pipeline processing system. PLE-linked analyses use the observable cohort (Year ≤ 2014) to avoid right-censoring bias.

National Profile **B4+ vs B5+ Thresholds** PLE-Passer Linkage Institution and Foreign Context Key Evidence for Policy Review Data, Methods, and Limitations

Score Bin Distribution and Cut-Off Threshold Context

What this shows: how examinees are distributed across the score spectrum, and how many fall at or above the two major thresholds discussed in the CMO (B4+ and B5+). These are NMAT examinee counts, not medical school admission numbers.

Score Bin Distribution by NMAT Year (Row % per Year)

Darker red = higher concentration in that bin for that year.

> Bin distribution table (row %)

Examinees Meeting Each NMAT Score Threshold

Threshold	Best-record examinees	Share of all (%)	Observable cohort size
B4+ (Bin 4 and above)	91409	69.9	
B5+ (Bin 5 and above)	78944	60.4	
B4 only (Bin 4)	12465	9.5	

The B4+ threshold (Bin 4 and above) encompasses a substantially larger pool than the B5+ threshold (Bin 5 and above). The B4-only group represents the marginal population affected by a choice between the two thresholds.

Threshold Context by University Type

This table shows how many examinees from each reported undergraduate institution type would fall at or above each threshold. These are NMAT score distributions, not medical school admissions.

University Type	Best-record examinees	B4+ (Bin 4 threshold)	B5+ (Bin 5 threshold)	B4-only (Bin 4 only)
Public	26937	19709 (73.2%)	17482 (64.9%)	2227 (8.3%)
Private	100584	69504 (69.1%)	59546 (59.2%)	9958 (9.9%)
Foreign	1862	1285 (69.0%)	1109 (59.6%)	176 (9.5%)
Not Specified	1352	911 (67.4%)	807 (59.7%)	104 (7.7%)

Public School Examinees and the B5+ Threshold

The CMO exception for B4-only (Bin 4) applicants is intended for disadvantaged groups (GIDA, IP communities). If most public school examinees already meet the B5+ (Bin 5 and above) threshold, then lowering the cut-off may not primarily benefit the intended disadvantaged groups.

Public examinees meeting B5+ ⓘ

17,482 (64.9%)

Public examinees in B4 only ⓘ

2,227 (8.3%)

Private examinees meeting B5+ ⓘ

59,546 (59.2%)

Metric	Public	Private
Total best-record examinees	26,937	100,584
B5+ (Bin 5 and above)	17,482	59,546
B5+ share (%)	64.9%	59.2%
B4 only (Bin 4 only)	2,227	9,958
B4 only share (%)	8.3%	9.9%

64.9% of public school examinees already meet the B5+ threshold. Only 8.3% of public school examinees fall in the B4-only band that the CMO exception addresses. This suggests the B4-only exception may benefit a relatively small share of public school examinees. Note that UNI_TYPE refers to the examinee's undergraduate institution, not necessarily the medical school they applied to, and GIDA/IP status is not available in this dataset.

Profile of the B4 Group (Bin 4 only)

B4 examinees (best record)

Share of Examinees in Top vs Bottom Bins by Year

➤ Top vs bottom bin share table

Yearly Examinees Meeting Each Threshold

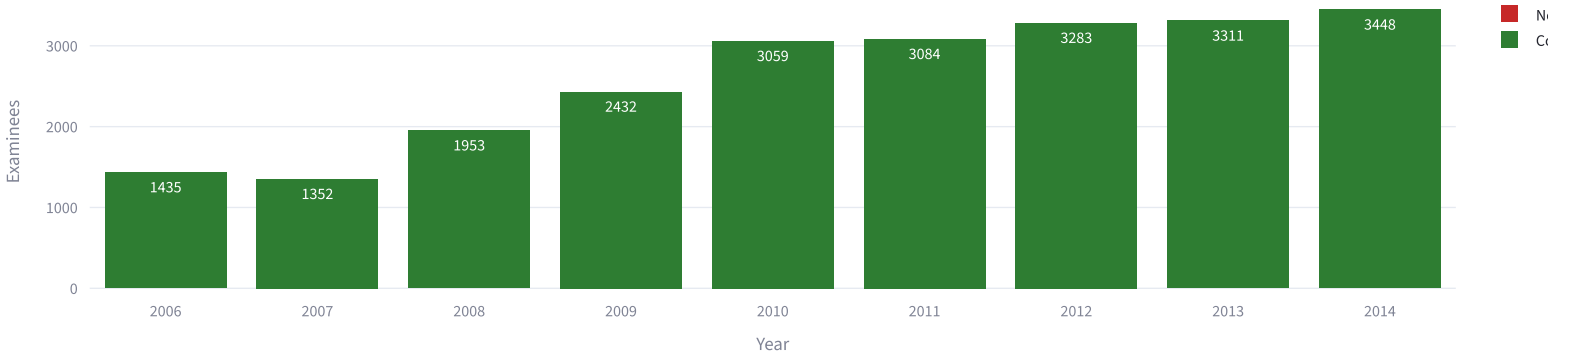

Year	Total (best record)	B4+ (Bin 4 threshold)	B4+ share (%)	B5+ (Bin 5 threshold)	B5+ share (%)	Observable B4+	Observable B5+
2006	3642	2655	72.9	2300	63.2	2655	2300
2007	3635	2643	72.7	2249	61.9	2643	2249
2008	4831	3603	74.6	3137	64.9	3603	3137
2009	6859	4965	72.4	4242	61.8	4965	4242
2010	7987	6128	76.7	5420	67.9	6128	5420
2011	8679	6552	75.5	5589	64.4	6552	5589
2012	8867	6410	72.3	5628	63.5	6410	5628
2013	8710	6361	73	5747	66	6361	5747
2014	9985	7292	73	6556	65.7	7292	6556
2015	9814	6941	70.7	6240	63.6	0	6240

The difference between B4+ and B5+ shares indicates how many additional examinees would meet a B4 threshold versus a B5 threshold in each year.

B5+ (Bin 5 and above) PLE-Passer Composition by Year

Among examinees who meet the B5+ threshold (Bin 5 and above, observable cohort), this chart shows the count and percentage who were later confirmed as PLE passers. Even as the share of top-bin examinees has declined, the absolute number of B5+ examinees who become PLE passers remains substantial.

B5+ Examinees by PLE Status (Count)

B5+ Examinees by PLE Status (Percent)

Year	Total B5+ (observable)	Confirmed PLE Passers	No Confirmed Match	Linkage Rate (%)
2006	1435	1435	0
